

Azalea® EHR SOAP Technology

Simultaneous collaboration

Why Azalea?

It's not complicated.

Azalea Health's fully integrated, cloud-based solution enables practices and hospitals to afford a sophisticated technology that meets all their needs at a fraction of the complexity and cost.

Azalea Health's patent pending SOAP technology (Subjective, Objective, Assessment, Plan) provides a flexible framework within Azalea EHR which allows multiple users to edit a single encounter simultaneously – all updates occur in real time.

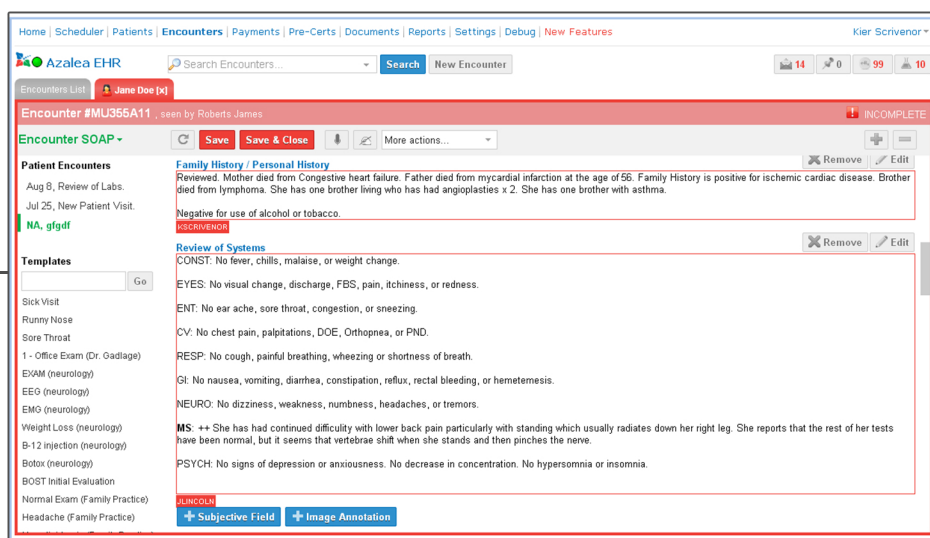

Proprietary SOAP Features:

- Clinical Charting & SOAP Generation
- Billing & Claims Processing
- Electronic Prescribing
- Voice Recognition & Dictation
- Multiple Assessment Templates
- Internal Form Builder
- SOAP Collaboration
- Image Annotation
- Insurance Verification & Address Validation
- Document Storage & Management
- Secure Messaging & Tasking System

SOAP Benefits:

- Initiate an encounter from a previously documented visit or from the template library.
- With collaborative real time, and simultaneous editing, users can view all edits as they occur.
- Embedded speech dictation software enables users to dictate directly into the SOAP notes.
- Image annotation feature enables users to create a visual.
- Users can generate custom fields within the SOAP feature.
- Users have access to extensive template library.

Azalea EHR enables multiple users to access and edit an encounter simultaneously with all updates occurring in real time.

The screenshot displays the Azalea EHR SOAP interface. At the top, there's a navigation bar with links like Home, Scheduler, Patients, Encounters, Payments, Pre-Certs, Documents, Reports, Settings, Debug, and New Features. Below this is a search bar for encounters. The main area shows an encounter for 'Jane Doe [x]' with ID #MU355A11, viewed by Roberts James. The encounter SOAP section is active, showing tabs for Patient Encounters, Family History / Personal History, Review of Systems, and Templates. The Family History tab is selected, displaying a detailed medical history. The Review of Systems tab is also visible, showing various system reviews. The Templates tab is at the bottom, listing various exam templates like Sick Visit, Runny Nose, Sore Throat, etc. The interface includes buttons for Save, Save & Close, and More actions....
